WICHITA MARKETS.

Receipts of Live Stock at the Union Stock Yards during the past 24 hours-44 Cattle, 413 Hogs. Shipments-None.

The receipts of cattle were light but there seemed to be no disposition on the part of buyers to take hold of the offer ings at the prices asked, so there was pothing done in the cattle alleys. The offerings were mostly of common cowand canners and the market on this class of cattle was dull and draggy. butcher cattle are strong and would sell readily. There is considerable inquiry for stockers and they would bring fair prices The market on common to poor cattle was from 10 to 15 cents lower than yester day, and the tone was weak.

The receipts of hogs were light again today. The quality of the hogs offered were pretty fair. The market opened strong and higher for good hogs, and trading was brisk. The bulk of the offerings taken by the local packers at from \$3.25 to \$3.40, with bulk at \$3.35. Pigs and lights brought \$2,2001\$2.50. The hog market has been dull and receipts light, during the entire week, but the past two days the price of good hogs has pavanced 20 cents. The receipts were a distile better today than for the past three days and the market closed active and 5 to 30 cents higher, tops bringing \$3.40. DEPRESENTATIVE SALES.

A Young Churchwoman. There's a 3-year-old New Jersey girl who belongs to an Episcopalian family. The first time she went to church she came

"It was very bad," she insisted. 'How do you know " asked her mother. "Recause all the people said so."

But they didn't, Kittie," urged the "Yes they did, too, mamma. Didn't I hear 'em keep saying, 'Lord have mercy on us miserable singers?' "

On another occasion she startled the family by announcing that Episcopalians were people who always did what they oughtn't to do, and left undone those things they ought to do.-Washington

Tests of Death.

It has recently been stated in various scientific and other journals that some ten or fifteen years ago a physician obtained a prize offered by the French Academy of Science for the discovery of some means by which the most inexperienced person might be able at once to ascertain whether life were really extinct in any given case.

His method was as follows: If the hand of the suspected dead person be held toward a candle or other artificial light, with the fingers extended and one touching the other, and one looks through the spaces between the fingers toward the light, there appears a scarlet red color where the fingers touck each other, due to the blood still circulating and showing itself through the tissues, if life has not yet ceased. When life is entirely extinct the phenomenon of scarlet space between the fingers at once ceases.

In commenting on the method in The says he vhas Peter Davis. Sergeant, you also have the statement that the test is sufdle of last Shuly." ficient in itself as too solemn to be allowed to pass uncorrected. This test trusted to ne is capable of producing serious error. In the case of a person in a state of syncope, where the test was most carefully an plied, there was not the faintest trace of red coloration between the fingers; yet recovery from the syncope was quite satisfactory without any artificial aid.

The test, being readily applied, is a good

one to bring into operation, but for absolute proof of death Dr. Richardson enumerates the following as preferable: (1) The pulsation of the heart, (2) the respiratory urmur, (3) pressure or veits, (4) the electric test for muscular irritability, (5) the ammonia hypodermic test, (6) congulation of blood in the veins, (7) rigor mortis, and

Butcher's Meat and Tuberculosis.

In an article relating to the Hebrew method of butchering and inspecting meat Dr. Henry Behraud, of London, cells attention to the great advantage of rigid meat inspections as a means of preventing tuberculosis, also to an alarming proportion of diseased animals, and an equally alarming lack of altruism in the Hebrew race as re-gards other races. He says: "Of 13,116 seves slaughtered for the Hebrew trade in London in six months only 6,973 were deemed fit for Jewish use. The average rejections for five years have been 40 per cent, but these rejections are often sold to the Gentiles for food." In a large practice of over thirty years he has never met a case of consumption in a Hebrew, and other physicians make similar statements.

It is a failacy to suppose that the eravings of a patient are mere whims which should be denited. The stomach often needs, craves and digests articles not found in any dietary.

Sulphur fumigation, notwithstanding some opposition on the ground of ineffi-cacy, is still highly recommended by the best authorities, says The Analyst, as the best disinfectant, after steam, for rooms, when properly done. The excitement of being tossed and

jumped by a too ardent papa, the giare of the daner table or a tarry romping about the room often unstring the delicate nerves and chose away sleep from a delicate enild. Rubbing the hands well with almond oil each night and plastering them with as enid the seedy looking person who stood much line chalk as they can take will usually whiten them in three days' time,
